Note:

1. Profit is determined using an approximate approach, without a fixed profit ratio established by the company.
 2. Investors are required to calculate their losses, and the company shares 50% of the calculated loss amount as part of its loss-sharing policy.
 3. The company maintains transparency by allowing investors to calculate their own profits and losses, while also participating in the sharing of losses at a 50% rate.
- Investments are guaranteed to be 100% secure, with payments becoming due upon the conclusion of the mutually agreed-upon timeframe.
